**Situations Vacant**

The events of Jerusalem during the last week of Jesus' earthly life brought pain and disappointment to his followers. However, the risen Jesus understood differently, gave different meaning to the whole experience. He saw the hand of God in all proceedings. In the midst of betrayal, suffering and injustice, he experienced the hope of divine justice. Jesus joined the conversation of two disciples on the way to Emmaus. He listened to their perspectives and experiences. However, because of resurrection the whole conversation took a different direction. Despair suddenly turned into hope in the loving presence of risen Jesus. Death lost its sting when the power of life became evident and transforming.

In many ways we are similar to the community of disciples in our feelings, thoughts and experiences. We have lost hope in life due to the structures and systems, we are in despair looking at the situations of people. Personally and as organisations, we go through similar experiences like the disciples. Because Jesus rose from the dead, He is inviting us to see a different perspective. A perspective of life, a perspective of life everlasting, a perspective of hope about divine justice. It is this perspective which gives us strength to go forward in love and compassion.

In the scripture, the phrase 'it is necessary ...' signifies a divine necessity. For example, when Jesus said in Luke 19:5 that he 'must' stay in Zacchaeus' house, this talks about the absolute necessity in Jesus'

*Continued on Page 2*

## Easter Message : One Event – Two Perspectives

perspective. There is divine ‘must-ness’ about certain things in life. This is the same case with the sufferings of Jesus Christ. There was a divine ‘must-ness’. The disciples thought that the series of events during the holy week would have been avoided. Jesus understood that ‘it was necessary’.

Jesus though his presence and power brought this new perspective about suffering and life as a whole. The resurrection of Jesus gives us a new perspective about the pain and suffering that we go through. Many things are necessary to happen, and they should not be and could not be avoided. They have a clear place in the larger plan of things.

When many of us would like to adhere to the thinking and patterns of this world ‘The Different Drum’ by M. Scott Peck gives the possibility of dancing to a different drum. When the imminent sound is so noisy and jarring, can we listen to a harmony at a distance? We who are involved in the healing ministry constantly face people with hopelessness and despair. Many who lost their meaning about life come to us to receive a significant help.

Can we get inspiration from the story of resurrection a new way of looking at life. After all, there is hope beyond the horizon. Christ is risen, therefore there is hope. May God use us to bring this hope to people whom we meet today through our words, attitudes and actions.

Christ is risen. Hallelujah!!!

*Rev. Dr. Arul Dhas T.*  
Head of Chaplaincy Department

## First Vellore Child Development Meeting

**The First Vellore Child Development Meeting (Research)** was jointly organised by the Developmental Paediatrics Unit under the India Alliance Fellowship and the Wellcome Trust Research Laboratory under the PRERNA (Platform for Research Excellence Related to National Aims) platform on 2<sup>nd</sup> and 3<sup>rd</sup> February, 2023. The meeting was conducted in the New Examination Hall, Bagayam campus and included international and Indian child development community research teams.

The meeting started with prayer and welcome by Dr. Beena Koshy, Professor, Developmental Paediatrics. Dr. Gagandeep Kang, Sr. Professor and Head, Wellcome Trust Research Laboratory addressed the gathering to set the tone for the next two days. Concurrent research was evaluated, and research gaps identified in the domains of Childhood development, Developmental interventions, Childhood growth, Child community-based behaviour studies and Child community-based neuroimaging. Once research priorities were identified per domain, a Delphi process was utilised to prioritise potential future research for the country by all experts. The teams discussed the way forward including utilising existing cohort dataset to address research gaps and future collaborative research.

International faculty from The Bill and Melinda Gates Foundation, USA, The University of Virginia, USA, University of Bergen, Norway and The University of Melbourne, Australia participated in this meeting. National teams included faculty and researchers from BIRAC (Biotechnology Industry Research Assistance Council), New Delhi; Society of Applied Studies (SAS) New Delhi; KEM Hospital, Pune; National Brain Research Centre, Delhi; St. John’s Research Institute, Bangalore, Sangath, Goa; and Indian Council of Medical Research, Bangalore. Participation from departments of CHAD (Community Health and Development), RUHSA (Rural Unit for Health and Social Affairs), LCECU (Low Cost Effective Care Unit), CAP (Child and Adolescent Psychiatry), PMR (Physical Medicine and Rehabilitation), and Radiology in addition to organising units enriched this research meeting.

## Diploma in Allergy and Asthma - Graduation Ceremony

Allergic disorders, including asthma, affect nearly 15% of India's population. This translates to an approximate figure of nearly 100 to 150 million patients. The prevalence of allergic diseases is increasing at an alarming rate, and there are not enough specialists who can offer standard care for the numerous patients who suffer from allergic disorders. Furthermore, there is a dearth of structured training programmes and few opportunities for the training and certification of allergists. To address this need, the Department of Pulmonary Medicine joined hands with the USA based International Asthma Services. This partnership has resulted in India's only structured training programme, namely the Diploma in Allergy and Asthma (DAA), with the help of trained allergy faculty from the American Centres of Excellence, USA.

DAA is a year-long distance learning course which has been offering services since 2006 to physicians specialized in Medicine, Paediatrics, ENT and Pulmonary Medicine. To date, more than four hundred doctors have received training through this programme. This course attracted doctors from all over India and other countries like Sri Lanka, Nepal, Kenya, Uganda, Rwanda, Indonesia, USA, Canada, UAE, Saudi Arabia and the Caribbean. DAA is endorsed by the 'American Academy of Allergy, Asthma and Immunology' (AAAAI), which is the World's largest and the most respected professional association of allergy and asthma specialists and the 'Center for Global Health', University of Colorado, USA.

The 15<sup>th</sup> and 16<sup>th</sup> DAA graduation ceremony for the 2020 & 2022 graduates was held on 12<sup>th</sup> January 2023 at the New Examination Hall. Dr. Sundeep Salvi, Director Pulmocare Research and Education (PURE) Foundation, Pune. Distinguished Professor of Research, Faculty of Health Sciences, Symbiosis International University was the Chief Guest and awarded the degrees, and the proficiency prizes. He encouraged the graduates to venture beyond their comfort zones if they hope to make any difference to the problem of allergy in India. The Course Directors, Dr. P.K. Vedanthan and Dr. D.J. Christopher exhorted them to adopt CMC's culture of service. A total of Sixty Six specialists have met minimum standards to qualify for the award of DAA this year. **Dr. Jefferson Daniel** was awarded the Dr. Henry Claman gold medal award for overall proficiency for the batch 2020. **Dr. Mahantesh Matti** was placed second and was awarded the Dr. Harold Nelson silver medal for the batch 2020. **Dr. Thanzeemunisa** was awarded the Dr. Henry Claman gold medal award for overall proficiency for the batch 2022. **Dr. Rohit K.O.** was placed second and was awarded the Dr. Harold Nelson silver medal for the batch 2022.

### 3<sup>rd</sup> National Congress on Asthma, Allergy and Immunology - Allergocon 2023

The Department of Pulmonary Medicine, conducted the 3<sup>rd</sup> National Congress on Asthma, Allergy and Immunology (Allergocon 2023) between 12<sup>th</sup> to 14<sup>th</sup> January, 2023. The workshop had participants who were general physicians, respiratory physicians, paediatricians, ENT surgeons and GPs with interest in the field of allergy. Distinguished faculty from India and overseas (UK, USA) delivered lectures covering the spectrum of allergy disorders. Lectures covered updates in the past year and there was a session on difficult clinical problems. The **SHELDON SPECTOR** oration was awarded to **Prof. Dr. Thirumala Krishna**. Around one hundred and fifty specialists participated in the conference. They were allowed to present their original research as free papers and posters and received valuable feedback from experts in the field. The first, second and third prize for oral presentation was won by **Dr. Arin Natania, Dr. Neeraj Gupta, Dr. Rajasekar** respectively. **Dr. Priya N.** and **Dr. Neeraj Gupta** won the prizes for difficult case presentations.

## Faculty Mentorship Programme - Commencement of 3<sup>rd</sup> batch of mentees

The Faculty Mentorship Programme is an endeavour launched by Human Resources under the Directorate in 2019 with the aim of linking junior faculty with experienced mentors to provide them a support network as they settle into their roles as teachers, clinicians and researchers within the institution.

This year, thirty eight junior faculty across various departments registered as mentees for the programme, which was considerably more than the previous years and thirty eight senior faculty volunteered to be their mentors for the year.

A half-day mentee training workshop was held on 11<sup>th</sup> March 2023 followed by a similar mentor training workshop on 18<sup>th</sup> March 2023, to prepare both groups for their respective roles. We had the good fortune of having retired and current faculty members as resource personnel for these workshops, the sessions of which were much appreciated.

The programme was formally initiated on 1<sup>st</sup> April 2023. Dr. Sowmya Sathyendra, Associate Director welcomed the gathering, Dr. J.V. Peter, former Director gave the special address while Dr. Ebby Simon, Deputy Director provided a brief overview for the year ahead. Thereafter, the session closed with mentors and mentees having their introductory meeting over lunch.

We sincerely hope and pray that this programme will provide a good platform for cultivating and passing on the ethos of the institution to succeeding generations of faculty.

April 09 - 15, 2023

## Special Prayers This Week

*CSI Madras Diocese*

Council Members

: *Rt. Rev. Dr. J. George Stephen*  
*Dr. J. Jerene Jayanth*

*CSI Kalyani Multi Speciality Hospital, Chennai*

*CSI Rainy Multi Speciality Hospital*

*CSI Hospital, Ikkadu and others*

## Memoranda

- **Dr. Paul Prabhakar Abhilash**, Professor, is appointed as Associate Medical Superintendent with effect from 3<sup>rd</sup> April 2023 for a four year term.
- **Dr. Abi Manesh S**, Associate Professor, is appointed as Acting Deputy Medical Superintendent with effect from 3<sup>rd</sup> April 2023 for one year.
- **Mrs. Nirmala Samuel**, Superintending Engineer, is appointed as Deputy General Superintendent (Chittoor Campus) with effect from 10<sup>th</sup> April 2023 for a four year term.

## Laurels and Recognitions

**Dr. Karthik Gunasekaran**, Associate Professor, Department of General Medicine Unit-V was awarded the first prize in the Turbo-talk oral presentation titled "Clinical profile and outcomes of inpatients with scrub typhus from a tertiary care center in South India". In the 2<sup>nd</sup> International Conference of the Society for Vector Ecology (SOVE), India region co-organised by ICMR, Vector Control Research Centre, Puducherry from 13<sup>th</sup> to 16<sup>th</sup> March, 2023.

## Retirement

**Erattum : Mr. A. Joel Milton Prasad**, Sel. Gr. Staff Clerk I, Department of PMR, retired on 27<sup>th</sup> February, 2023. He served 40 years of service in our institution. He joined Biostatistics Department in 1983 as Data Entry Operator under the Headship of Dr. P.S.S. Sunder Rao and was later transferred to the Department of PMR in 1986. Mr. Joel Milton was handling IP/OP Physiotherapy appointments and was also responsible in monitoring and co- Coordinating Physiotherapy Equipments and Its smooth functioning. He has worked closely with several heads of the department for over three decades.

His wife, Mrs. Kutty Eileen, also worked in our Institution. His daughter Dr. Jennifer Rebecca is currently pursuing her MD Microbiology at CMC, Vellore. He was the GSB representative of PMR department for two terms. He is a very good singer and is greatly interested in music.

The CMC community is thankful for his long years of dedication and commitment to the institution and wishes God's blessings on his retired life.

## Obituaries

• **Dr. Nupur Opal (nee Tandon)** (MBBS Batch of 1975), left for her heavenly abode on 19<sup>th</sup> March 2023, after bravely battling malignancy for nearly two years. Born on 5<sup>th</sup> August 1957, Dr. Nupur was based in Delhi at the time of her selection for medical training in CMC Vellore. After graduating, she returned to Delhi, where she worked in the Obstetrics and Gynecology Department of St. Stephen's Hospital, as well as in PHCs in Bageshwar and surrounding villages near Almora. Subsequently, as an employee of the Delhi Municipal Corporation, she served the deprived colonies in East Delhi. After her marriage to Major Ajay Opal in 1987, Dr. Nupur moved to different places with him, mostly working in army hospitals as a medical officer. She also found time for a stint in

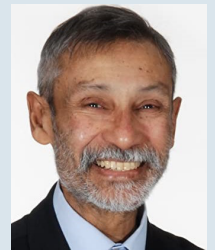

Nasirabad Mission Hospital. Between 2000-2003 in Devlali, and subsequently, for another four years in Delhi, she worked as the Principal of ASHA Schools for the differently abled under AWWA. After Mr. Ajay's retirement from the army, Dr. Nupur refused the chance to settle in Delhi, Chandigarh or Gurdaspur. Instead, she chose to live in his village (Kahnuwan), travelling every day to Gurdaspur to work in an ECHS clinic for veterans and running a charitable clinic for the villagers in the evening. Throughout her life Dr. Nupur served the poor and disadvantaged, fulfilling the motto of her alma mater. Despite having to change jobs often, she never took time away from medical work. An avid gardener and book lover, Dr. Nupur was also very fond of dogs. She always had dogs to care for, and looked after many, including her favourites Chikki, Gikky, Gypsy, Buddy and Pinky. She also looked after one of her classmates' dog for a whole year while she was away abroad. Adventurous by nature, she did parachute jumping and parasailing.

Dr. Nupur was a kind, noble and gentle soul with great depth and a lovely sense of humour. Diligent and focussed in whatever she did, she was also skilled at gently coaxing her colleagues to finish their tasks. In the last few years her posts in the class group were very much admired for their firm opinions on social justice, without being judgmental. Dr. Nupur did what she wanted, and did everything with a purpose. She was strong and courageous, always believing the best of people. Cheerful and positive, she was a great role model as a wife, mother and friend.

Dr. Nupur is survived by her husband Mr. Ajay Opal, daughter Ira and son Uday and daughter-in law Isha and her parents Mr. Ramesh and Mrs. Rajini Tandon. Family may be contacted at email and phone number [uday.opal@gmail.com](mailto:uday.opal@gmail.com) +91 85859 13873.

Our thoughts and prayers are with the bereaved members of the family at this time.

• **Dr. Karna Dev Bardhan** (MBBS Batch of 1958), Dr. Karna Dev (Chandu) Bardhan known as Chandu was born in 1940 in Jhansi. He sadly passed away peacefully at home on the 5<sup>th</sup> April, 2023 after the stroke he had in June 2022.

His father, a pathologist, was in the Army, and he later became the first Dean of the Armed Forces Medical College. To ensure a stable and secure education in view of the frequent transfers to different towns that his father's army postings entailed, he was sent as a boarder to Doon School in Dehradun. After he completed his schooling, he joined the batch of 1958 of students when he started his medical training at the Christian Medical College Vellore. A keen scholar, he won several awards at College including the medal for the Best Outgoing Student. In the year that he graduated he came first in the Madras University.

In 1964, he was awarded a Rhodes Scholarship and left for Oxford, UK where he completed his DPhil, 'Studies on Intrinsic Factor in Man'. After training posts at the Hammersmith Hospital in London and then the Royal Hospital in Sheffield, he took up his substantive consultant post as General Physician / Gastroenterologist in 1973 at the age of 32 years at Rotherham District General Hospital (RDGH), a non-academic centre.

He single-handedly built up the Gastroenterology Department and a research unit which became a centre of excellence both nationally and internationally. He collaborated with the pharmaceutical industry, using the funds to build up his team of lab staff, nurses and secretaries to support the research projects. His personal remuneration from the research projects was ploughed back to fund research Fellows undertaking PhDs, MDs and MScs. As management of the hospital changed, the funds were put into a regulated charity, The Bardhan Research and Education Trust (BRET), and this work was continued. A total of 54 grants was awarded until he retired in 2014. The work of BRET is now continued at Sheffield Teaching Hospitals.

He loved his work, and his infectious enthusiasm motivated and inspired his staff and students. His enquiring mind and breadth of vision, together with his willingness to help, drew people to work with his team in Rotherham. His junior staff were well trained and supported to go forward. He often said that the accomplishments of the BRET-supported people and other young trainees, had given him far greater joy than anything he himself had achieved and that he was immensely proud of them.

## Obituaries

Continued from Page 6

His rigour in clinical practice and research, and his compassion and care in the wellbeing of his patients, were paramount. He was much loved and respected by his patients and staff. The training at CMC, with its motto 'Not to be ministered unto, but to Minister', was part of his life.

He was beset by serious cardiovascular problems, including myocardial infarct, stents and bypasses, from the age of 43, but this did not prevent him from wholeheartedly undertaking clinical and research work.

He is the first ever recipient of the Lifetime Achievement Award from the British Society of Gastroenterology. He was honoured by the town of Rotherham as Citizen of the Year and was made a Freeman of the Borough. He was awarded the honour of an OBE by The Queen.

He is survived by his wife, Dr. Gouri Bardhan (nee Kumar) (MBBS batch of 1959-60), retired consultant haematologist, his son, Satyajeet, a philanthropy strategist, his daughter, Suchitra, a paediatric gastroenterologist, and his three grandchildren.

Dr. Karna Dev Bardhan has written a book entitled "An Improbable Journey in Medicine: A Story of Courage and Enterprise" which is available in Amazon (available in India, UK, US, Australia and Europe). The family plan to donate all profits to food charities.

Those who may wish to get in touch with the family, the contact details of his Dr. Gouri Bardhan is given below:

Email : [gouri@bardhan.co.uk](mailto:gouri@bardhan.co.uk)

Our thoughts and prayers are with the bereaved members of the family at this time.

• **Mrs. Harriet**, retired Hospital Attendant, W ward passed away on 7<sup>th</sup> April, 2023.

Let us uphold her son, Mr. Joe Bai, former staff, HLRS, daughter -in- law Mrs. Parveen, former staff, G4 East Ward and all the bereaved members of the family in our prayers.

## Upcoming Events

• **American Heart Association – International Training Centre (CMC, Vellore)**

**American Heart Association –Paediatric Advanced Life Support (AHA-PALS) course**

The **AHA-PALS** course will be held on the **25<sup>th</sup> and 26<sup>th</sup> April 2023** at the CK Job Hall, Paul brand building, **CMC, Vellore**. This well known Paediatric Advanced Life Support Course, accredited by the American Heart Association and American Academy of Paediatrics, is valid internationally. The number of participants is strictly restricted to 18 as per AHA guidelines. **The registration fee is Rs.7000/-** (cost of study materials included). The last date for registration is **14<sup>th</sup> April, 2023**. This two day course is designed for healthcare providers (Doctors, Nurses, Paramedics) who initiate advanced life care in acutely ill children, beyond basic life support, through the stabilization or transport phases of a paediatric emergency. The course consists of lectures, videos, discussions and hands - on sessions based on simulated case scenarios and aims to train the participants in early recognition and emergency management of critically ill children with an emphasis on team concept. **For enquiries and registration, please contact Ms. Nitha Cathuanor & Mr. Ganesh, Paediatric ICU (Phone No.0416-228-3366).**

• **The 63<sup>rd</sup> Early Management of Trauma Course (EMTC) for Doctors & Nurses**. The course is scheduled for the **19<sup>th</sup>, 20<sup>th</sup> & 21<sup>st</sup> of June 2023**. As there has been a great demand for the same, seats are restricted to thirty on a first-come-first-serve basis. **The registration fee is Rs.6,500/-**. For further details contact. Mr. Senthil Kumar, Secretary, Department of Emergency Medicine - Phone No. **0416-228-2225**.

**Note : Registration will not be entertained after 31<sup>st</sup> May, 2023.**
