

World Patient Safety Day observed

World Patient Safety Day, which falls on the 17th of September, was observed last month by CMC's Quality Management Cell. The programme, based on this year's theme of 'Medication Safety - Medication Without Harm', included orientation on patient safety by Quality Manager, Dr. Lallu Joseph, followed by academic sessions centred on the six International Patient Safety Goals. Apart from this, an e-quiz, an e-poster competition and a walkathon to spread awareness on patient safety were also organised.

The program was attended by 320 participants including Department Quality Managers (DQMs), Department Safety Advisors (DSAs), medical, nursing and Allied Health students as well as students and faculty from the Department of Hospital Management Studies and Staff Training & Development.
