

STATE LEVEL WORKSHOP ON “CLINICAL LEARNING: EXPERIENCES AND EXPECTATIONS”

DEPARTMENTS OF NURSING FOUNDATION AND CNE & RESEARCH, COLLEGE OF NURSING, CMC, VELLORE

Clinical learning is an important component of nursing education that forms half of the educational experience of students. A well planned and organised clinical experience is needed for the development of competence. Nursing students' have many expectations about clinical learning experience. However, if these expectations are not matched with their experiences, it may lead to lack of interest in patient care and professional development. Good clinical experience provides better clinical learning. This workshop will equip ward in charges and nursing teachers to plan, design and provide organised clinical learning based on the guidelines and newer trends.

OBJECTIVES

This workshop will enable the participants to

1. Identify the need for quality clinical learning
2. Plan, design and organise high quality clinical experience
3. Implement the guidelines for clinical skill development
4. Explore the challenges in clinical learning experience
5. Incorporate the trends in clinical learning
