ABOUT THE WORKSHOP

Nurses serve as a backbone of the colorectal team. The success of any colorectal surgical treatment depends not only on the chosen modality but also on the competent, committed and quality nursing care. Quality care to colorectal patients demands the nurses to be abreast of changing trends in colorectal cancers and be competent in providing comprehensive care to patients with colorectal cancers.

Since the treatment of colorectal cancers is multimodal, a committed colorectal Nursing team helps the patients to understand the disease better and provides guidance appropriately in collaboration with multi disciplinary team.

Hence, the Department of Surgical Nursing in collaboration with Colorectal Surgery Unit, Christian Medical College, Vellore is organizing a workshop on the theme "Colorectal Nursing - A Leading edge" to update the knowledge and skills of nurses caring for patients with colorectal cancers."

OBJECTIVES OF THE WORKSHOP

- **Obtain insight on colorectal cancers: Indian and Global context**
- **Gain awareness on trends in management of colorectal cancers**
- **Explore pathways in perioperative nursing care of patients with colorectal cancers**
- **Analyse the role of colorectal nurse specialist**
- **Develop specific skills in assessment and management of colorectal cancers**
- **Update evidence based practices and research findings in Colorectal Nursing**
