

## Workshop On Qualitative Research (Virtual)

Department of Continuing Nursing Education & Research, College of Nursing, CMC, Vellore.

Qualitative research explores subjective human experiences and feelings which can't be expressed in numerics. The contribution of qualitative research in nursing is advancing in certain aspects of nursing knowledge. Nursing with multidimensional nature of knowledge necessitates qualitative understanding of a phenomenon.

The qualitative research workshop is offered with an aim of enabling participants to

- review basics of qualitative nursing research
- design and conduct a meaningful interview
- transcribe and translate the qualitative data
- collect observational data for qualitative research
- analyse the qualitative data using software
- write the qualitative finding

*Eagerly waiting for your active participation!!!*
