The 6th Annual Renal Symposium on “Genetics and Kidney Diseases” aims to provide an understanding of the basis of ordering, interpreting, and applying the results of genetic testing to day-to-day nephrology practice.

15th Renal Clinical Conference, the flagship program of CMC Nephrology that was started in 2006 on the occasion of Prof. Chakko Korula Jacob’s superannuation, involves long & short cases work up and presentations by the trainees to the faculty. There will be short sessions on Renal Pathology and DSA testing in Renal Transplantation.

A Quiz on Genetics and kidney diseases will be conducted on 20th January 2023. A preliminary round will be conducted during the lunch break on 20th January to select the final teams for the Quiz.
