The 8th Annual Renal Symposium on “Kidney Disease Beyond: Exploring Multisystem Interactions” brings together leading experts from different fields, delving into the complex interplay between kidney and other organs, its pathophysiology, clinical implications, and emerging therapeutic strategies. We look forward to fostering meaningful discussions that will further elevate the standards of nephrology practice and ultimately enhance patient outcomes.

The 17th Renal Clinical Conference, the flagship program of CMC Nephrology that was started in 2006 on the occasion of Prof Chakko Korula Jacob’s superannuation involves short and long cases work up and presentation by the trainees to the faculty. There will be a short presentation on interesting cases of transplant immunology.

An interactive and competitive quiz session is designed to engage and challenge nephrology residents with a series of thought-provoking questions that test their knowledge in key areas of nephrology. The Quiz will be conducted in 2 rounds on 10th January 2025, with a preliminary round conducted during the lunch break to select the teams for the final round.
